Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on 26 December 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of group VII, claims 34-35 in Paper No. 15 is acknowledged.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 35 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 35 confusingly recites "wherein the agent is wnt3a" however it would appear that it should reflect that wnt3a is the Wnt polypeptide of choice.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under

Art Unit: 1651

the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 34 are rejected under 35 U.S.C. 102(a,b,e) as being anticipated by Humes et al(5686289).

Applicant claims a culture medium for DP cells which contains a Wnt polypeptide.

Humes et al disclose a cell culture medium for animal cells containing Wnt (see claims) thus anticipating the claim subject matter.

Claims 34 are rejected under 35 U.S.C. 102(e) as being anticipated by McMahnnon et al(6485972).

Applicant claims a culture medium for DP cells which contains a Wnt polypeptide.

McMahon et al disclose a cell culture medium for animal cells containing Wnt including 3a thus anticipating the claim subject matter (see example 7 for example).

Claims 34 & 35 are rejected under 35 U.S.C. 102(a,b,e) as being anticipated by Rogers et al (5208145).

Art Unit: 1651

Applicant claims a culture medium for DP cells which contains a Wnt polypeptide or mimicking agent thereof, e.g. LiCl.

Rogers teaches a cell medium which contains lithium chloride. The reference anticipates the claim subject matter as LiCl is a mimicking agent of Wnt and is placed in a medium suitable for maintaining animal cells (col 5 for example).

Claims 34 & 35 are rejected under 35 U.S.C. 102(a,b) as being anticipated by Sato(JP408066183A).

Applicant claims a culture medium for DP cells which contains a Wnt polypeptide or mimicking agent thereof, e.g. LiCl₂.

Sato (Derwent English abstract enclosed) teaches a cell culture medium which contains lithium chloride. The reference anticipates the claim subject matter as LiCl is a mimicking agent of Wnt and is placed in a medium suitable for culturing animal cells.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 35 is rejected under 35 U.S.C. 103(a) as being unpatentable over Humes et al(5686289).

Applicant claims a culture medium for DP cells which contains a Wnt polypeptide.

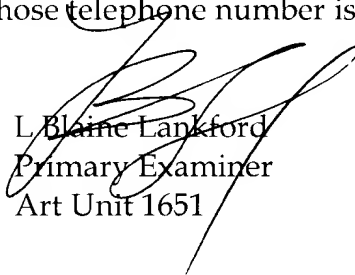

Humes et al disclose a cell culture medium for animal cells containing various Wnt's (see claims) . Humes does not teach using wnt3a in the medium however at the time the invention was made it would have been obvious to use a known analog of the Wnt's used by Humes such as 3a with a reasonable expectation of the same activity as is shown by Humes' exemplified Wnt's.

Accordingly, the claimed invention was prima facie obvious to one of ordinary skill in the art at the time the invention was made especially in the absence of evidence to the contrary.
